

Dear JOHN PURCELL,
Congratulations on a wonderful school year at BUCKNER FANNING CHRISTIAN
SCHOOL!

According to your Accelerated Reader Real Time data, your students using AR read an average of 397907 words each, and have taken an average of 37 quizzes each, making your school stand out on a national level for its impressive achievement in student reading practice. You should be very proud.

It's clear your school has made a commitment to the importance of reading practice—a vital building block for students' overall academic achievement. It's this kind of performance and dedication we'll be looking for when we evaluate schools and districts this fall for our national reading achievement awards, such as our What Kids Are Reading Award!

Educators thank us all the time for developing Accelerated Reader, but it's really your dedicated teachers and you who make it work. I encourage you to forward this information to your district and the community to let them know about your wonderful news.

Best of luck for continued success with your AR program.

Sincerely,
Joel Burdick
